

## Utilities

### Electricity/Natural Gas

- [MidAmerican Energy Company](#)
- [Northwest Iowa Power Cooperative \(NIPCO\)](#)
- [Woodbury County Rural Electric Cooperative \(REC\)](#)

### Water

The City of Sioux City provides water to the entire Sioux City MSA within the three-state region and has additional capacity and source to meet the increasing industrial and commercial needs of the metro area. The Zenith Plant is a conventional filter plant with a capacity of 30 million gallons per day (MGD). The new Southbridge Regional Water Treatment Plant, a membrane filter plant completed in 2011, has an initial capacity of 10 MGD expandable to 30 MGD.

### Waste Water

The City of Sioux City provides quality waste management services with infrastructure and capacity available to facilitate growth. The City's sanitary sewer plant underwent a \$73.6 million multi-phase expansion and upgrade in 2012. The plant is sized and configured to handle future industries in the food processing, agri-business, and biotechnology sectors.
